

Invites you to participate in

A Study of Children and Their Perceptions

This study seeks to compare the perceptual, social, and behavioral skills of **7-12 year old children** diagnosed with autism versus those children who are not diagnosed with autism

- **Participation:** Children will complete cognitive and perceptual tasks and parents will complete surveys rating the child's characteristics
- **Time Commitment:** A single session to be conducted at Canisius College
 - Child tasks will take from 120-150 minutes to complete
 - Parent surveys will require approximately 90 minutes
- **Compensation:** Participants will receive a \$40 Target gift card
